CARBONLESS

NCR PAPER *

XERO/FORM® II

# Create Carbonless Forms On-Demand on Your Copiers and Laser Printers!

Save Time and Improve Efficiencies with NCR PAPER* Brand Xero/Form® II
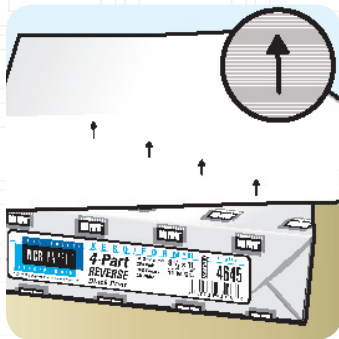

Why Create Your Own Multi-Part Forms?

Save money – print only what you need

Save time – get them now

**Save effort** – easily print on-demand, variable data

It's Easy to Make Your Own Custom Forms. Here's How...

1. Start with Xero/Form® II blank sheets.

2. Print forms using a laser printer or copier.

3. And create custom forms in seconds, one sheet at a time.

4. Then mark just the top ply. The image will transfer to all plies.
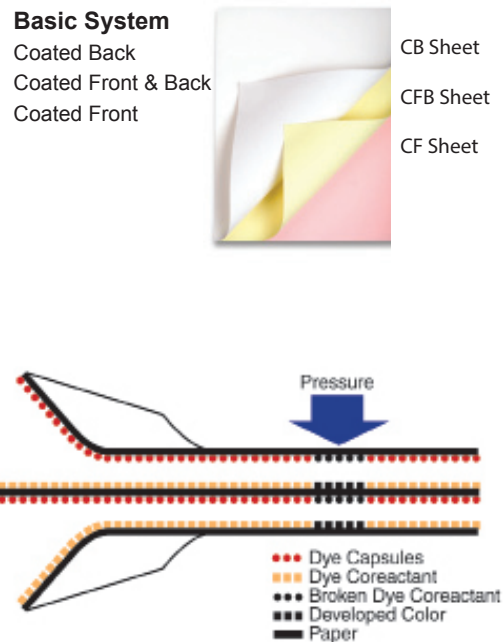

Xero/Form® II and Your Equipment:

- Easily create custom forms using document software.
- Ideal solution for short-run, on-demand multi-part forms.
- Eliminates storage, costly over-runs, and waste of obsolete, pre-printed forms.
- Delivers sharp, professional results.
- Safe to use on office equipment.

What is Xero/Form® II Carbonless and How Does it work?

It's a basic and user-friendly paper system designed for making multi-part forms using office equipment including laser printers and copiers:

- NCR PAPER* brand products have proprietary coatings that allow for automatic transfer of information written on the top sheet of a printed form. Images written on the top sheet are reproduced on all plies in the form set.

- Fixed and variable information is printed using a laser or inkjet printer.

- The transferred information is created when the pressure of writing causes a colorless dye and coreactant, coated on the sheets, to come into contact. The dye develops a dark color, almost instantaneously.

- In a form set, the carbonless plies need to be in the correct order: Coated-Back/Coated-Front-and-Back/Coated-Front (CB/CFB/CF).

Basic System
Coated Back — CB Sheet
Coated Front & Back — CFB Sheet
Coated Front — CF Sheet

Pressure

- Dye Capsules
- Dye Coreactant
- Broken Dye Coreactant
- Developed Color
- Paper
